Blade-Mounted Trailing Edge Flap Control for Bvi Noise Reduction National Aeronautics and Space Administration (NASA) 2018-07-23 Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. Terrace VI Sarah L Johnson 2021-07-07 Welcome to the Sixth Terrace of Dante's tower of Purgatory, serving up sins of gluttony in an eternal banquet. On this carefully curated menu you'll find children stuffing themselves to death, a forgotten saviour gorging on cheeseburgers between bareknuckle rounds on the roadhouse circuit, wealthy socialites revel in an orgiastic alien feast, and the end of days as seen through an apocalyptic carnival of indulgence. Excessive consumption also manifests in darker hungers, for cruelty, for distraction, or possession. A pair of grifters bent on having it all chase a Scottish leprechaun across the English countryside, a newly deceased addict vies for the attention of Heavenly Higher Ups, degenerate poker players gamble with unforeseen currency, and when an old lady swallows a fly, it's just the beginning... Featuring nine stories of grotesque appetite and glorious excess from a gory gaggle of creators, they say too much of anything is poison, yet these condemned swallow each piece of forbidden fruit while reaching for the next, never to be sated. They can't help themselves. Can you? Stories and art by: Mike Thorn (Darkest Hours, Shelter for the Damned) Robin van Eck (Rough) Eddie Generous (Camp Summit, What Lurks Beneath, Behemoth Rising) Julie Hiner (Final Track) Konn Lavery (Mental Damnation Series, Rutherford Manor Series) Cam Hayden (Futility, Red Flag) Sarah L. Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Treaties and International Agreements Registered Or Filed and Recorded with the Secretariat of the United Nations United Nations Staff 2000 Treaties and International Agreements Registered or Filed and Recorded with the Secretariat of the United Nations **Housing+** Ulrike Wietzorrek 2014-01-01 High-quality residential structures are much more than merely a series of different floor plans. First and foremost, the urban apartment house mediates between the private refuge and the public space of the city. In the process, boundaries between inside and outside are negotiated on a wide variety of scales. Housing+ focuses on investigating spatial and architectural as well as social and communicative interfaces in residential construction. The publication is divided into four chapters Urban Planning, The Ground Floor, Building Structure, and Facade to which sixty-seven international projects are assigned. These four thematic focuses are discussed comprehensively in the essays that introduce the chapters, and the individual projects are analyzed in brief under these same aspects. Comparable plans drawn especially for this book supplement the typological descriptions. The broad spectrum of projects selected covers urban apartment block construction from towers, block structures, row houses, and gaps between buildings, to housing complexes in outlying urban areas."

Safe Passage Institute of Medicine 2001-11-20 Safe Passage: Astronaut Care for Exploration Missions sets forth a vision for space medicine as it applies to deep space voyage. As space missions increase in duration from months to years and extend well beyond Earth's orbit, so will the attendant risks of working in these extreme and isolated environmental conditions. Hazards to astronaut health range from greater radiation exposure and loss of bone and muscle density to intensified psychological stress from living with others in a confined space. Going beyond the body of biomedical research, the report examines existing space medicine clinical and behavioral research and health care data and the policies attendant to them. It describes why not enough is known today about the dangers of prolonged travel to enable humans to venture into deep space in a safe and sane manner. The report makes a number of recommendations concerning NASA's structure for clinical and behavioral research, on the need for a comprehensive astronaut health care system and on an approach to communicating health and safety risks to astronauts, their families, and the public.

The Arthur of the North Marianne E. Kalinke 2015-11-20 The Arthur of the North is the first book-length study of the Arthurian literature that was translated from French and Latin into Old Norse-Icelandic in the thirteenth century, which has been preserved mostly in Icelandic manuscripts, and which in early modern times inspired the composition of narrative poems and chapbooks in Denmark, Iceland and Norway, chiefly of the Tristan legend. The importation of Arthurian literature in the North, primarily French romances and lais, is indebted largely to the efforts of King Hákon Hákonarson (r. 1217–63) of Norway, who commissioned the translation of Thomas de Bretagne's Tristan in 1226, and subsequently several Arthurian romances by Chrétien de Troyes and a number of Breton lais. The translations are unique in that the French metrical narratives were rendered in prose, the traditional form of narrative in the North. The book concludes with a chapter on Arthurian literature in the Rus' area, precisely East Slavic, with a focus on the Belarusian Trysčan.

Auto Repair For Dummies Deanna Sclar 2019-01-07 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Loose Leaf for New Products Management C. Merle Crawford 2020-01-21 Crawford's New Product Management 12e provides the management approach to teaching new products, with the perspective of marketing. Adopters of previous editions will notice that the format is slimmed down to 18 chapters. This streamlined presentation focuses on the topics that will be of most importance and interest to new product managers. Significant updates can be found throughout, and great pains have been taken to present the "best practices" of industry and relevancy to readers. Past adopters of New Products Management will notice major changes in this edition. While there are some changes in virtually every chapter, some of the most substantial changes are as follows: 1.We have made major additions and updates to the cases to provide more plentiful and more current examples. We retired several cases from the previous edition, wrote many new cases, and thoroughly updated many others. New cases for this edition include: Oculus Rift, Adidas Parley sustainable running shoes, Google Glass, Indiegogo, Tesla, Chipotle, Chick-fil-A, Corporate Social Responsibility at Starbucks, and many others. As always, we aim to offer a mix of high tech products and

consumer products and services in the set of cases. 2. In addition, we have substantially updated examples throughout the text wherever possible. We try to make use of illustrative examples that will resonate with today's students wherever possible. Of course, we welcome the reader's comments and suggestions for improvement. 3. There continues to be much new research in new products, and we have tried to stay current on all of these topics. Readers will notice new or expanded coverage of portfolio management, value curve creation, the TRIZ method, crowd-sourcing, crowdfunding, observational research, open innovation, organizational structure, 3D modeling, beta testing, sustainable product development, and frugal innovation, among other topics. 4. We continue the practice of referencing Web sites of interest throughout the text, and we have added the web addresses for several useful YouTube videos and other resources.

Just Needs a Recharge Rob Siegel 2018-04-24 Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin. 101 Performance Projects for Your BMW 3 Series 1982-2000 Wayne R. Dempsey 2006-09-15 Since its introduction in 1975, the BMW 3-series has earned a reputation as one of the world's greatest sports sedans. Unfortunately, it has also proven one of the more expensive to service and maintain. This book is dedicated to the legion of BMW 3-series owners who adore their cars and enjoy restoring, modifying, and maintaining them to perfection; its format allows more of these enthusiasts to get out into the garage and work on their BMWs—and in the process, to save a fortune. Created with the weekend mechanic in mind, this extensively illustrated manual offers 101 projects that will help you modify, maintain, and enhance your BMW 3-series sports sedan. Focusing on the 1984-1999 E30 and E36 models, *101 Performance Projects for Your BMW 3-Series* presents all the necessary information, covers all the pitfalls, and assesses all the costs associated with performing an expansive array of weekend projects.

The Innovation Stack Jim McKelvey 2020-03-10 From the cofounder of Square, an inspiring and entertaining account of what it means to be a true entrepreneur and what it takes to build a resilient, world-changing company In 2009, a St. Louis glassblowing artist and recovering computer scientist named Jim McKelvey lost a sale because he couldn't accept American Express cards. Frustrated by the high costs and difficulty of accepting credit card payments, McKelvey joined his friend Jack Dorsey (the cofounder of Twitter) to launch Square, a startup that would enable small merchants to accept credit card payments on their mobile phones. With no expertise or experience in the world of payments, they approached the problem of credit cards with a new perspective, questioning the industry's assumptions, experimenting and innovating their way through early challenges, and achieving widespread adoption from merchants small and large. But just as Square was taking off, Amazon launched a similar product, marketed it aggressively, and undercut Square on price. For most ordinary startups, this would have spelled the end. Instead, less than a year later, Amazon was in retreat and soon discontinued its service. How did Square beat the most dangerous company on the planet? Was it just luck? These questions motivated McKelvey to study what Square had done differently from all the other companies Amazon had killed. He eventually found the key: a strategy he calls the Innovation Stack. McKelvey's fascinating and humorous stories of Square's early days are blended with historical examples of other world-changing companies built on the Innovation Stack to reveal a pattern of ground-breaking, competition-proof entrepreneurship that is rare but repeatable. The Innovation Stack is a thrilling business narrative that's much bigger than the story of Square. It is an irreverent first-person look inside the world of entrepreneurship, and a call to action for all of us to find the entrepreneur within ourselves and identify and fix unsolved problems—one crazy idea at a time.
