Biography and Children Stuart Hannabuss 1993 This title examines the perceived value of biographical information and the way in which it is used by librarians and educationalists. There is an historical view of literature, together with a detailed investigation of contemporary material published for children. This book provides a critical and biographical guide to such materials, some of which are international, but with emphasis on British and American publications.

Situating Children of Migrants across Borders and Origins Claudio Bolzman 2017-10-25 This open access wide-ranging collation of papers examines a host of issues in studying second-generation immigrants, their life courses, and their relations with older generations. Tightly focused on methodological aspects, both quantitative and qualitative, the volume features the work of authors from numerous countries, from differing disciplines, and approaches. A key addition in a corpus of literature which has until now been restricted to studying the childhood, adolescence and youth of the children of immigrants, the material includes analysis of longitudinal and transnational efforts to address challenges such as defining the population to be studied, and the difficulties of follow-up research that spans both time and geographic space. In addition to perceptive reviews of extant literature, chapters also detail work in surveying the children of immigrants in Europe, the USA, and elsewhere. Authors address key questions such as the complexities of surveying each generation in families where parents have migrated and left children in their country of origin, and the epistemological advances in methodology which now challenge assumptions based on the Westphalian nation-state paradigm. The book is in part an outgrowth of temporal factors (immigrants' children are now reaching adulthood in more significant numbers), but also reflects the added sophistication and sensitivity of social science surveys. In linking theoretical and methodological factors, it shows just how much the study of these second generations, and their families, can be enriched by evolving methodologies. This book is open access under a CC BY license

Common Core Curriculum Maps in English Language Arts, Grades K-5 Common Core 2011-10-19 *Handbook of Research on Children's and Young Adult Literature* Shelby Wolf 2011-04-27 This landmark volume is the first to bring together leading scholarship on children's and young adult literature from three intersecting disciplines: Education, English, and Library and Information Science. Distinguished by its multidisciplinary approach, it describes and analyzes the different aspects of literary reading, texts, and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children's literature. Part one considers perspectives on readers and reading literature in home, school, library, and community settings. Part two introduces analytic frames for studying young adult novels, picturebooks, indigenous literature, graphic novels, and other genres. Chapters include commentary on literary experiences and creative production from renowned authors and illustrators. Part three focuses on the social contexts of literary study, with chapters on censorship, awards, marketing, and literary museums. The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds, thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory.

American National Biography John A. Garraty 2005-05-12 American National Biography is the first new comprehensive biographical dictionary focused on American history to be published in seventy years. Produced under the auspices of the American Council of Learned Societies, the ANB contains over 17,500 profiles on historical figures written by an expert in the field and completed with a bibliography. The scope of the work is enormous—from the earliest recorded European explorations to the very recent past.

Official Portraits and Unofficial Counterportraits of At Risk" Students" Richard J. Meyer 2010-01-15 This book chronicles 5th and 6th grade writers in a poor, culturally diverse, rural school in the southwest US coming into their voices, cultivating those voices, and using those voices in a variety of venues, beginning with the classroom community and spreading outward. The big ideas of official and unofficial portraits are presented, followed by data and facets of the theoretical construct of counterportraits in each chapter, as a response to official portraits.

Learning from the Left Julia L. Mickenberg 2005-11-10 At the height of the Cold War, dozens of radical and progressive writers, illustrators, editors, librarians, booksellers, and teachers cooperated to create and disseminate children's books that challenged the status quo. Learning from the Left provides the first historic overview of their work. Spanning from the 1920s, when both children's book publishing and American Communism were becoming significant on the American scene, to the late 1960s, when youth who had been raised on many of the books in this study unequivocally rejected the values of the Cold War, Learning from the Left shows how "radical" values and ideas that have now become mainstream (including cooperation, interracial friendship, critical thinking, the dignity of labor, feminism, and the history of marginalized people),

were communicated to children in repressive times. A range of popular and critically acclaimed children's books, many by former teachers and others who had been blacklisted because of their political beliefs, made commonplace the ideas that McCarthyism tended to call "subversive." These books, about history, science, and contemporary social conditions—as well as imaginative works, science fiction, and popular girls' mystery series—were readily available to children: most could be found in public and school libraries, and some could even be purchased in classrooms through book clubs that catered to educational audiences. Drawing upon extensive interviews, archival research, and hundreds of children's books published from the 1920s through the 1970s, Learning from the Left offers a history of the children's book in light of the history of the history of the Left, and a new perspective on the links between the Old Left of the 1930s and the New Left of the 1960s. Winner of the Grace Abbott Book Prize of the Society for the History of Children and Youth

Helping Your Children with Reading and Writing at Home Mary A. Colbert & William P. Colbert 2009-01-31 Helping Your Children with Reading and Writing at Home By Mary Ann Colbert & Dr. William P. Colbert There really is no place like home when it comes to developing competent readers and writers. And with the aid of our new world changing guide the process and the goal of developing lifelong readers and writers will be greatly facilitated. Many years ago we set about finding out what type of reading and writing help parents and other adults were giving children and how it was working, We asked everyone and anyone who would talk with us and we came up with some rather startling information to share in our guide. Now talking with parents, grandparents. adults and children about the reading and writing activities they have experienced at home is second nature to us. Through the years, we have discovered that a great many things are happening in American homes relative to helping children in these areas and even greater things are possible. The purpose of our book (We like to call it a guide.) is to awaken parents. grandparents and other adults, who work with children, to the great possibilities that are open to them that will revolutionize learning now and for future generations. The ideas, suggestions and strategies in our guide step off from the interests of the learners (which are the best indicators of what the children are ready and able to learn next) as opposed to curriculums and textbooks which often have an iron grip on what is available for young students to learn. We show our readers how to take advantage of the great knowledge they have about their children and how to use it to guide their children's learning., and, more especially, to identify what is the next appropriate step for their children to take in their learning. All this is done in the home setting with family members participating and sharing the fruits of their learning labors. Besides giant leaps in learning, families can expect outstanding growth in family interpersonal relationships. The family is actually drawn closer together by sharing their diverse interests.. At the onset of the guide adults are asked to compare their thinking on reading and writing learning with some of the experts in the field via a true-false checklist. This technique totally involves parents with the book from the start. and parents are often surprised to see how their thinking coincides with experts in the field. The next section contains three case studies that illustrate, in detail, exactly what some very effective adults did to further the reading and writing skills of the children with whom they worked. The third sections contain some precise strategies that parents and other adults can begin using today with their children. The next sections identifies what children see as effective reading and writing strategies that are used by parents and their teachers. Section five is a summary of some ideas of some great teachers of reading and writing. The ideas here are undergirded by some sound learning principles which every adult, who works with children, will want to know about. The final section ends much like the guide begins with a checklist of some true - false items that will help guide parents and other adults to increasing success in helping their children with reading and writing at home.

Teaching Gifted Learners in STEM Subjects Keith S. Taber 2017-07-31 This book offers an overview of programmes designed to support the learning of gifted and talented students in STEM subjects, both to allow them to meet their potential and to encourage them to proceed towards careers in STEM areas. The chapters from a range of national contexts report on perspectives, approaches and projects in gifted education in STEM subjects. These contributions provide a picture of the state of research and practice in this area, both

to inform further research and development, and to support classroom teachers in their day-to-day work. Chapters have been written with practitioners in mind, but include relevant scholarly citations to the literature. The book includes some contributions illustrating research and practice in specific STEM areas, and others which bridge across different STEM subjects. The volume also includes an introductory theoretical chapter exploring the implications for gifted learners of how 'STEM' is understood and organized within the school curriculums.

Australian Dictionary of Biography, 1981-1990 Diane Langmore 2007 Volume 17 of the Australian Dictionary of Biography contains 658 biographies of individuals who died between 1981 and 1990. The first of two volumes for the decade, it presents a colourful mosaic of twentieth-century Australian life. It contains biographies of well-known identities such as Sir Henry Bolte, Sir Robert Askin, Sir Reginald Ansett, Sir

Macfarlane Burnet, Sir Raphael and Lady Cilento, Sir Arthur Coles, Robert Holmes-O-Court, Sir Warwick Fairfax, Sir Edmund Herring, Albert Facey, Donald Friend, Sir Roy Grounds, Sir Bernard Heinze and Sir Robert Helpmann. Eminent Australian women in the volume include Dame Elizabeth Couchman, Dame Kate Campbell, Dame Doris Fitton, Dame Zara Holt and Lady (Maie) Casey. Although many of the women achieved prominence in those professions conventionally regarded as the preserve of women, othersandmdash;such as Ruby Boye-Jones, coast-watcher; Ellen Cashman, union organiser; Elsie Chauvel, film-maker; Dorothy Crawford, radio producer; Ruth Dobson, diplomat; Mary Hodgkin, anthropologist; Margaret Kelly, restaurateur; and Patricia Jarrett, journalistandmdash;demonstrate that some women at least were breaking free of the constraints of traditional expectations. The lives of fifteen Indigenous Australians are included, as are those of a number of immigrants who fled from persecution in Europe to establish a new life in Australia. Scaffolding Emergent Literacy Anne Keil Soderman 1999 This books helps practicing teachers better understand the process of literacy development within the framework of developmentally appropriate practice...its main focus is the practical application of the theory with real children in preschool through fifth grade classrooms...examines the way literacy impacts the entire child, socially, emotionally, cognitively and physically.
