Voluntary Health Insurance in Europe Anna Sagan 2016-07-21 No two markets for voluntary health insurance (VHI) are identical. All differ in some way because they are heavily shaped by the nature and performance of publicly financed health systems and by the contexts in which they have evolved. This volume contains short, structured profiles of markets for VHI in 34 countries in Europe. These are drawn from European Union member states plus Armenia, Iceland, Georgia, Norway, the Russian Federation, Switzerland and Ukraine. The book is aimed at policy-makers and researchers interested in knowing more about how VHI works in practice in a wide range of contexts. Each profile, written by one or more local experts, identifies gaps in publicly-financed health coverage, describes the role VHI plays, outlines the way in which the market for VHI operates, summarizes public policy towards VHI, including major developments over time, and highlights national debates and challenges. The book is part of a study on VHI in Europe prepared jointly by the European Observatory on Health Systems and Policies and the WHO Regional Office for Europe. A companion volume provides an analytical overview of VHI markets across the 34 countries.

Handbook of Health Social Work Sarah Gehlert 2019-08-20 The updated third edition of the definitive text on health social work Thoroughly revised and updated, the third edition of Handbook of Health Social Work is an authoritative text that offers a comprehensive review of the diverse field of health social work. With contributions from a panel of international experts in the field, the book is theory driven and solidly grounded in evidence-based practice. The contributors explore both the foundation of social work practice and offer guidance on effective strategies, policies, and program development. The text provides information that is essential to the operations of social workers in health care including the conceptual underpinnings and the development of the profession. The authors explore the practice issues such as theories of health behavior, assessment, communication and the intersections between health and mental health. The authors also examine a wide range of examples of social work practices including settings that involve older adults, nephrology, oncology, and chronic diseases such as diabetes, heart disease, HIV/AIDS, genetics, end of life care, pain management and palliative care, as well as alternative treatments, and traditional healers. This is the only handbook of its kind to unite the body of health social work and: • Offers a wellness, rather than psychopathological perspective and contains treatment models that are evidence-based • Includes learning exercises, further resources, research suggestions, and life-course information. • Contains new chapters on topics such as international health, insurance and payment systems, and implementation of evidence-based practice • Presents information on emerging topics such as health policy in an age of reform, and genomics and the social environment • Reviews new trends in social work and health care including genetics, trans-disciplinary care, and international, national, and state changes in policy Written for social work educators, administrators, students, and practitioners, the revised third edition of Handbook of Health Social Work offers in one volume the entire body of health social work knowledge.

Handbook of Health Economics Mark V. Pauly 2012-01 What new theories, evidence, and policies have shaped health economics in the 21st century? Editors Mark Pauly, Thomas McGuire, and Pedro Pita Barros assemble the expertise of leading authorities in this survey of substantive issues. In 16 chapters they cover recent developments in health economics, from medical spending growth to the demand for health care, the markets for pharmaceutical products, the medical workforce, and equity in health and health care. Its global perspective, including an emphasis on low and middle-income countries, will result in the same high citations that made Volume 1 (2000) a foundational text. Presents coherent summaries of major subjects and methodologies, marking important advances and revisions. Serves as a frequently used non-journal reference. Introduces non-economists to the best research in health economics.
