**Odes** Sharon Olds 2016-09-08 'Interspersed with acts of breathtaking linguistic daring.' Charlotte Mendelson, Observer Book of the Year Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her - the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here - Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

**Workers in Training Manual** Enoch Adeboye 2016-08-04 Commitment to the Almighty God is the highest priority for the Christian and it cannot be taken lightly because of its eternal implications. There should be assurance of salvation that is Bible based, which lasts forever. There is a need for an extra spiritual effort on the souls saved to get them established, localised in a church fellowship and mobilised until they too become soul winners. It is not enough for the believer in Christ to go forth and bear fruits in obedience to the Lord's command but must also ensure that the fruits abide. This is why the Workers-in-Training programme is packaged to equip believers for service unto God and the edification of the body of Christ. Our prayer is that at the end of these teachings, you would have become a true Christian, on fire for God and ready to take up mountains. God bless you as you get empowered for the work of ministry, in Jesus name. Amen

**Data Engineering** Yupo Chan 2009-10-15 DATA ENGINEERING: Mining, Information, and Intelligence describes applied research aimed at the task of collecting data and distilling useful information from that data. Most of the work presented emanates from research completed through collaborations between Axiom Corporation and its academic research partners under the aegis of the Axiom Laboratory for Applied Research (ALAR). Chapters are roughly ordered to follow the logical sequence of the transformation of data from raw input data streams to refined information. Four discrete sections cover Data Integration and Information Quality; Grid Computing; Data Mining; and Visualization. Additionally, there are exercises at the end of each chapter. The primary audience for this book is the broad base of anyone interested in data engineering, whether from academia, market research firms, or business-intelligence companies. The volume is ideally suited for researchers, practitioners, and postgraduate students alike. With its focus on problems

arising from industry rather than a basic research perspective, combined with its intelligent organization, extensive references, and subject and author indices, it can serve the academic, research, and industrial audiences.

**Unstoppable** Yanni Raz 2016-06-09 Unstoppable is a word defined as "difficult or impossible to preclude or stop." As a human quality, it is something that we associate with people such as sports superstars, those who do whatever it takes to inspire others and lead teams to the greatest of victories. Sometimes, an idea or person can become unstoppable. Unstoppable, like Charles Lindbergh crossing the Atlantic in a solo flight when no one had thought it was possible, or track star Roger Bannister breaking the four-minute mile barrier. Not everyone can be an explorer or a great athlete, but anyone can be unstoppable in their chosen endeavors in life. If you are willing to possess an unwavering determination to succeed and a consistent willingness to learn and evolve, you can become unstoppable and triumph too. This book is about a personal struggle, one in which the author awoke from a coma after a terrible accident and faced a life of permanent paralysis. A long battle of driven determination resulted in Yanni Raz regaining his health and becoming a self-made millionaire after migrating from his native Israel to the United States. Through careers as a musician, a Starbucks barista, a salesman, a real estate whiz, a professional poker player and a hard money lender, Yanni learned reliable principles and the skills necessary for success. Unstoppable covers many topics including controlling your life, making the best decisions, creating new opportunities, properly assessing signals, expertly negotiating, and succeeding by storytelling across the media landscape. You'll learn about integrity in business, asset diversification, and many other life tips that thousands of people learn from Yanni on a daily basis. **Special Purpose Computers** Berni J. Alder 2014-05-10 Special Purpose Computers describes special-purpose computers and compares them to general-purpose computers in terms of speed and cost. Examples of computers that were designed for the efficient solution of long established algorithms are given, including Navier-Stokes hydrodynamic solvers, classical molecular dynamic machines, and Ising model computers. Comprised of seven chapters, this volume begins by documenting the progress of the CalTech Concurrent Computation Program and its evolution from computational high-energy physics to a supercomputer initiative, with emphasis on the lessons learned including computer architecture issues and the trade-offs between in-house and commercial development. The reader is then introduced to the QCD Machine, a special-purpose parallel supercomputer that was designed and built to solve the lattice quantum chromodynamics problem. Subsequent chapters focus on the Geometry-Defining Processors and their application to the solution of partial differential equations; the Navier-Stokes computer; parallel processing using the Loosely Coupled Array of Processors (LCAP) system; and the Delft Ising system processor. The design and implementation of the Delft molecular-dynamics processor are also described. This book will be of interest to computer engineers and designers.

**Rtu Vidyā** Sinu Joseph 2020-11-29 The book ?tu Vidy? emerged in search of answers to questions asked by adolescent girls and women in India during the author’s interactions with them as part of Menstrual Health workshops, conducted over a span of a decade across rural India. In an attempt to decode menstrual practices, the author undertook a journey across India and studied various indigenous knowledge systems such as ?a?-Dar?ana, ?yurved, Tantra, Cakra, Y?g, ?gama ??stra, Jyotis?a ?a?stra, and several sub-texts from these categories. This book is for all Indian women who have unanswered questions pertaining to menstrual practices, for menstrual researchers who will find a treasure trove of potential areas for research pertaining to menstrual health, for sportswomen to discover the ancient techniques that worked in sync with women’s periods and not against it, and also for the feminist who assumes that cultural practices around menstruation are a taboo that needs to be done away with. The correct understanding of the science behind menstrual practices, as given in this book, will help women prevent menstrual difficulties, develop a positive attitude toward menstruation, and learn to work in sync with nature’s cycles. ?tu (pronounced as ruthu) is one of the terms for menstruation in Sanskrit. **The Snark Bible** 2014-09-02 The lord of snark, Lawrence Dorfman, is back! With this treasury of backhanded compliments, sarcastic insults, and catty comebacks, Dorfman gives us transformative wisdom that’s sure to change your life—or at least induce a light chuckle. One question plagues us all: How do we survive all the Sturm und Drang of everyday life? The answer is but one word: snark. “She wears her clothes as if they were thrown on by a pitchfork.” —Jonathan Swift “Why don’t you get a haircut? You look like a chrysanthemum.” —P. G. Wodehouse “He’s a mental midget with the IQ of a fence post.” —Tom Waits “They hardly make ’em like him anymore—but just to be on the safe side, he should be castrated anyway.” —Hunter S. Thompson “He has a Teflon brain . . . nothing sticks” —Lily Tomlin “He has no more backbone than a chocolate éclair.” —Theodore Roosevelt Snark will keep the wolves at bay (or at least out on the porch). Snark, much like a double scotch, will help you deal with relatives, shopping, and rudeness; it is an outlet for the unleashed vitriolic bile that’s saved itself up over the months. Like a shield, it will protect you while you go about your life. Snark is your answer!
