**Understanding Proto-insurgencies** Daniel Byman 2007 This study examines how terrorist groups transition to insurgencies and identifies ways to combat proto-insurgents. It describes the steps groups must take to gain the size and capabilities of insurgencies, the role of outside state support, and actions governments can take to prevent potential insurgencies from blossoming. The most effective U.S. counterinsurgency action would be to anticipate the possibility of insurgencies developing; it could then provide training and advisory programs and inhibit outside support.

**Public Health Consequences of E-Cigarettes** National Academies of Sciences, Engineering, and Medicine 2018-06-18 Millions of Americans use e-cigarettes. Despite their popularity, little is known about their health effects. Some suggest that e-cigarettes likely confer lower risk compared to combustible tobacco cigarettes, because they do not expose users to toxicants produced through combustion. Proponents of e-cigarette use also tout the potential benefits of e-cigarettes as devices that could help combustible tobacco cigarette smokers to quit and thereby reduce tobacco-related health risks. Others are concerned about the exposure to potentially toxic substances contained in e-cigarette emissions, especially in individuals who have never used tobacco products such as youth and young adults. Given their relatively recent introduction, there has been little time for a scientific body of evidence to develop on the health effects of e-cigarettes. Public Health Consequences of E-Cigarettes reviews and critically assesses the state of the emerging evidence about e-cigarettes and health. This report makes recommendations for the improvement of this research and highlights gaps that are a priority for future research.

**Review of Social Determinants and the Health Divide in the WHO European Region** Michael Marmot 2014 The WHO European Region has seen remarkable health gains, though inequities persist both between and within countries. Much more is understood now about the extent and social causes of these inequities, particularly since the 2008 report of the Commission on Social Determinants of Health. This review of inequities in health across the 53 Member States of the Region was commissioned to support the development of the new European policy framework for health and well-being, Health 2020. It builds on the global evidence and recommends policies to reduce health inequities and the health divide across all countries, including those with low incomes. The report is presented in four parts. Part I provides the

context and background to the review, and sets out the key principles underpinning the recommendations and the rationale for grouping them into four broad themes: life-course stages, wider society, the broader macro-level context, and governance, delivery and monitoring systems. Part II summarizes current evidence on the magnitude of the health divide among European Region countries, describing the inequities in health and their social determinants. Part III focuses on the four themes, making recommendations with supporting evidence. Part IV outlines the implementation issues, summarizes the framework for action, discusses reasons for failure, provides guidance on good practice and summarizes the review's conclusions and recommendations. The review is a wake-up call to political and professional leaders alike, an opportunity for them to facilitate the work of those dedicated to improving health outcomes and narrow the health gap between and within the countries of the Region.

*The Leading Edge of Early Childhood Education* Nonie K. Lesaux 2021-02-23 The Leading Edge of Early Childhood Education aims to support the effort to simultaneously scale up and improve the quality of early childhood education by bringing together relevant insights from emerging research to provide guidance for this critical, fledgling field. It reflects the growing recognition that early childhood experiences have a powerful effect on children's later academic achievement and long-term life outcomes. Editors Nonie K. Lesaux and Stephanie M. Jones bring together an impressive array of scholarly contributors. Topics include: · creating learning environments that support children's cognitive and emotional development; · identifying and addressing early risk factors; · using data to guide educators' practice; and · capitalizing on the use of technology. Recent years have seen a surge of local, state, and national initiatives aimed at expanding and improving early childhood initiatives, particularly regarding access to preK programs. The Leading Edge of Early Childhood Education promises to be a valuable resource for those charged with

enacting the next level of work in this critical area.

*How's Life? 2013* Collective 2014-07-31 Every person aspires to a good life. But what does "a good or a better life" mean? The second edition of *How's Life?* provides an update on the most important aspects that shape people's lives and well-being: income, jobs, housing, health, work-life balance, education, social connections, civic engagement and governance, environment, personal security and subjective well-being. It paints a comprehensive picture of well-being in OECD countries and other major economies, by looking at people's material living conditions and quality of life across the population. Through a wide range of comparable well-being indicators, the report shows that countries perform differently in the various dimensions of well-being. For instance, low-income countries in the OECD area tend to do very well in subjective well-being and work-life balance, while their level of material well-being is much lower than that of other OECD countries. The report responds to the needs of citizens for better information on well-being and the needs of policy makers to give a more accurate picture of societal progress. In addition, the report contains in-depth studies of four key cross-cutting issues in well-being that are particularly relevant. First, this report analyses how well-being has changed during the global economic and financial crisis. Even though some effects of the crisis may become visible only in the long-term, the report finds that the Great Recession has large implications for both economic and non-economic well-being of households. Secondly, the report looks at gender differences in well-being, showing that the traditional gender gap in favour of men has reduced but has not disappeared. It also finds that women and men do well in different areas of well-being and that they are increasingly sharing tasks and roles. Third, it looks at the quality of employment and well-being in the workplace. The report presents evidence on the main factors that drive people's commitment at work and are key to strengthening their capacity to cope with demanding jobs. Finally, the last chapter of the report

studies the links between current and future well-being. It looks at ways to define and measure sustainability of wellbeing over time. How's Life? is part of the OECD Better Life Initiative, launched by the Organization on the occasion of its 50th Anniversary in 2011. The OECD Better Life Initiative aims to promote "Better Policies for Better Lives", in line with the OECD's overarching...

**Addressing Adversity** Marc Bush 2018-02-08 An edited collection of papers published by YoungMinds and funded by Health Education England. With 1 in 3 adult mental health conditions related directly to adverse childhood experiences, it is vital that we understand the impact that adversity and trauma can have on the mental health and wellbeing of young people, and how we can strengthen resilience and support recovery. Addressing Adversity presents evidence, insight, direction and case studies for commissioners, providers and practitioners in order to stimulate further growth in adversity and trauma-informed care, and spark innovation and good practice across England. Section 1: Understanding adversity, trauma and resilience includes evidence and analysis of the impact that adverse childhood experiences and trauma have on children and young people's mental health and wider outcomes across the lifecourse. Section 2: Addressing childhood adversity and trauma includes insights from the NHS in England, organisations and clinicians working with children and young people who have experienced forms of adversity and trauma. Section 3: Emerging good practice includes insight, case studies and working examples of adversity and trauma-informed service models being developed across England. The collection ends with an agenda for change, calling on all Directors of Public Health, commissioners and providers to make adversity and trauma-informed care a priority in their locality.

**How to Write a Good Scientific Paper** CHRIS A. MACK 2018 Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning

and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

*Issues in Science and Theology: Do Emotions Shape the World?*

Dirk Evers 2016-04-14 This volume examines emotions and emotional well-being from a rich variety of theological, philosophical and scientific and therapeutic perspectives. To experience emotion is a part of being human; but what are emotions? How can theology, philosophy and the natural sciences unpack the nature and content of emotions? This volume is based on contributions to the 15th European Conference on Science and Theology held in Assisi, Italy. It brings together contributions from scholars of various academic backgrounds from around the world, whose individual insights are made all the richer by their juxtaposition with those from experts in other fields, leading to a unique exchange of ideas.
