Resources for Teaching Middle School Science Smithsonian Institution 1998-03-30 With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area--Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type--core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed--and the only guide of its kind--Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.

Slaying the Clowns Eric Logan 2018-04-22 Do you yearn to find your true mental, physical and emotional capacity in life? Eric Logan did, and he searched for an event that would challenge every fiber of his being and reveal his true character and capability. He found it in Kokoro, a 52 hour extreme fitness event originally designed for Navy SEAL and other special operator candidates. Eric signed up and attacked the event the year he turned 50. Kokoro is the brainchild of Mark Divine, Founder and CEO of Unbeatable Mind and SEALFIT, author of Way of the SEAL and Unbeatable Mind and Commander (Ret), US Navy SEALs. Kokoro is a 52 hour physical, mental and emotional team endurance event modeled after the SEAL's Hell Week. Eric trained at Commander Divine's CrossFit affiliate, US Crossfit, for 5 years before attempting Kokoro. Kokoro participants have historically had a 30% success rate. Kokoro, and the broader SEALFIT program, integrate physical, mental, emotional, intuitional and awareness training to develop elite-level warriors, leaders and teams. Eric is the Chief Operating Officer of COBRA PUMA Golf in Carlsbad, California, and he desired to enter the event and gain as much insight as possible about his capacity as an athlete, a leader, a husband and a father. Eric's teammates at Kokoro 42 (the 42nd iteration of the event) included a 2 time Golden Gloves boxing champion, a 7 time Spartan Race champion, an ultramarathon racer and a professional hockey player, so he had his work cut out for him, attempting to keep up with his teammates and add value to the team. While he wasn't the fittest athlete that toed the line for the start of Kokoro 42 in April, 2016, he had a clear and strong "Why" for attempting the event and a drive that would keep him from quitting. Come walk beside Eric and learn some of the lessons that he learned during Kokoro 42: - How to face your fears - How to face uncertainty - How your faith can support you and deliver you from life's darkest moments - How to deal with life's roller coaster-managing the inevitable ups and downs without getting too high or low - How to learn your strengths and use them daily for the benefit of you and others - How to learn your weaknesses, how to work around them and hopefully, how to turn them into strengths - How to be helpful in all situations - How to be an encouragement to others - How to find close life partners (Swim Buddies) who challenge and encourage you - How to operate well as a member of a team, with your family, your workmates, your athletic event teammates - Finally, and most importantly, how to learn that your capacity for life, love and work is so much bigger than you ever imagined Ready to go? Hooyah!
