**Genre in the Classroom** Ann M. Johns 2001-11-01 For the first time, the major theoretical and pedagogical approaches to genre and related issues of social construction are presented in a single volume, providing an overview of the state of the art for practitioners in applied linguistics, ESL/EFL pedagogies, rhetoric, and composition studies around the world. Unlike volumes that present one theoretical stance, this book attempts to give equal time to all theoretical and pedagogical camps. Included are chapters by authors from the Sydney School, the New Rhetoric, and English for Specific Purposes, as well as contributions from other practitioners who pose questions that cross theoretical lines. **Genre in the Classroom**: \*includes all of the major theoretical views of genre that influence pedagogical practice; \*takes an international approach, drawing from all parts of the world in which genre theory has been applied in the classroom--Australia, Canada, Hong Kong, the Middle East, the United States; \*features contributors who are all both theorists and classroom practitioners, lending credibility and authenticity to the arguments; \*combines theory and practice in every chapter, showing how particular theoretical views influence classroom practice; \*grounds pedagogical practices in their own regional and theoretical histories; \*openly discusses problems and questions that genre theory raises and presents some of the solutions suggested; and \*offers a concluding chapter that argues for two macro-genres, and with responses to this argument by noted genre theorists from three theoretical camps.

**College Writing Skills** Peder Jones 2002-10 College Writing Skills uses

explanation, demonstration, and practice to teach skills essential to success in college writing. For this course Peder Jones and Jay Farness have constructed a framework of rhetoric--work in composing paragraphs and essays--around disciplined study of sentences and words. The authors have sought in each section of the book to combine the most useful features of contemporary and traditional approaches to college English. Their overall aim is to enable the beginning college writer to compose clear and effective sentences, paragraphs, and compositions. This new edition of College Writing Skills is a refinement of the four previous editions; it has been shaped by helpful comments from students and instructors who have used the course. Exercises have been updated, and many minor changes for clarity have been made. Basic features of this text have not changed, however. As a hybrid of textbook and workbook, it continues to stress focused practice leading to directed independent composing activities; it emphasizes student writing rather than students reading about writing. This emphasis translates into more than 500 sets of exercises, more than 100 optional workshop activities, and an Appendix covering special problems in the acquisition of English. The exercises in this textbook embody our belief that practice is crucial to improving one's writing skills. Accordingly, this text provides practice in forming ideas, in getting ideas out one's head and onto paper, in experimenting with various sentence structures in order to achieve clarity, in following models of correct grammar and effective style, and in making the writing process pay off through effective revision and editing.
