*Science Fiction and the Prediction of the Future* Gary Westfahl, 2014-01-10 Science fiction has always challenged readers with depictions of the future. Can the genre actually provide glimpses of the world of tomorrow? This collection of fifteen international and interdisciplinary essays examines the genre’s predictions and breaks new ground by considering the prophetic functions of science fiction films as well as SF literature. Among the texts and topics examined are classic stories by Murray Leinster, C. L. Moore, and Cordwainer Smith; 2001: A Space Odyssey and its sequels, Japanese anime and Hong Kong cinema; and electronic fiction.

*Flood* Stephen Baxter 2009-07-23 From Terry Pratchett's co-author on the Long Earth books comes the ultimate disaster novel - the world is drowning and there is nowhere left on earth to go. Next year. Sea levels begin to rise. The change is far more rapid than any climate change predictions; metres a year. Within two years London, only 15 metres above the sea, is drowned. New York follows, the Pope gives his last address from the Vatican, Mecca disappears beneath the waves. Where is all the water coming from? Scientists estimate that the earth was formed with seas 30 times in volume their current levels. Most of that water was burnt off by the sun but some was locked in the earth's mantle. For the tip of Everest to disappear beneath the waters would require the seas to triple their volume. That amount of water is still much less than 1% of the earth's volume. And somehow it is being released. The world is drowning. The biblical flood has returned. And the rate of increase is building all the time. Mankind is on the run, heading for high ground. Nuclear submarines prowl through clouds of corpses rising from drowned cities, populations are decimated and finally the dreadful truth is known. Before 50 years have passed there will be nowhere left to run. FLOOD tells the story of mankind's final years on earth. The stories of a small group of people caught up in the struggle to survive are woven into a tale of unimaginable global disaster. And the hope offered for a unlucky few by a second great ark ...

**The Light of Other Days** Arthur C. Clarke 2010-01-11 From Arthur C. Clarke, the brilliant mind that brought us 2001: A Space Odyssey, and Stephen Baxter, one of the most cogent SF writers of his generation, comes a novel of a day, not so far in the future, when the barriers of time and distance have suddenly turned to glass. When a brilliant, driven industrialist harnesses cutting-edge physics to enable people everywhere, at trivial cost, to see one another at all times–around every corner, through every wall–the result is the sudden and complete abolition of human privacy, forever. Then the same technology proves able to look backward in time as well. The Light of Other Days is a story that will change your view of what it is to be human. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*The Green Odyssey* Philip José Farmer 2016-03-10 The Green Odyssey' is an uproarious, hell-bent adventure story, combining fantasy, imagination and science, with a liberal dash of humor. It is in the best tradition of adventure science fiction, a swashbuckling tale of a resourceful spaceman who is, however, uneasily aware that he may have been miscast. Fortunately, he has the assistance of a large, gorgeous, energetic and adoring female who is supremely confident of his ability to handle all comers. With her help, that is. Alan Green was not exactly a hero. In fact he liked peace just as well as the next man. Not that he was really afraid of that crazy, hot-blooded hound-dog Alzo, or even of the hound's gorgeous owner, the Duchess Zuni-who was also hot-blooded (to say nothing of the Duke). After all, these things were understood on this backward, violent planet, and a man could manage, provided he was alert twenty-four hours a day.

*The Paying Guests* Sarah Waters 2014-09-02 A truly extraordinary, masterful novel of brilliant storytelling, sensuality, and psychological suspense set in post-WWI London, from the internationally bestselling author of The Little Stranger. Three-time Booker Prize finalist Sarah Waters is at the height of her powers. A psychological and dramatic tour de force from beloved international bestseller Sarah Waters. The year is 1922, and London is tense. Ex-servicemen are disillusioned, the out-of-work and the hungry are demanding change. In South London, in a large silent house now bereft of brothers, husband, and even servants, life is about to be transformed, as Mrs Wray and her daughter Frances are obliged to take in lodgers. With the arrival of Lilian and Leonard Barber, the routines of the house and the lives of its inhabitants will be shaken up in unexpected ways. And as passions mount and frustration gathers, no one can foresee just how far, and how devastatingly, the disturbances will reach. Waters proves once again that her eye for the telling details of class and character that draw people together as well as tear them apart is second to none in this masterpiece of psychological tension and emotional depth.

**Rama: The Omnibus** Arthur C. Clarke 2011-11-17 At first, only a few things are known about the celestial object that has arrived in the galaxy and has been dubbed Rama by the astronomers observing it. It is a huge cylindrical object, weighing more than ten trillion tons. And it is hurtling through the solar system at inconceivable speed. Then a space probe confirms the unthinkable: Rama is no natural object. It is, incredibly, an interstellar spacecraft. Space explorers and planet-bound scientists alike prepare for mankind's first encounter with alien intelligence. It will kindle their wildest dreams ... and fan their darkest fears. For no one knows who the Ramans are or why they have come. And now the moment of rendezvous awaits - just behind a Raman airlock door.

**Time's Eye** Arthur C. Clarke 2010-06-10 A stunning new companion series to 2001 A SPACE ODYSSEY from the world's most important SF writer and his acknowledged heir 1885, the North West Frontier. Rudyard Kipling is witness to a bizarre encounter between the British army and what appears to be an impossibly advanced piece of Russian technology. And then to a terrifying intervention by a helicopter from 2037. Before the full impact of this extraordinary event has even begun to sink in, Kipling, his friends and the helicopter crew stumble across Alexander the Great's army. Mankind's time odyssey has begun. It is a journey that will see Alexander avoid his premature death and carve out an Empire that expands from Carthage to China, beating the time-slipped army of Ghenghis Khan in a battle outside the ruins of Babylon in the process. And it will present mankind with two devastating truths. Aliens are amongst us and have been manipulating our past and our future. And that future extends only as far as 2037, for that is the date Earth will be destroyed. This is SF that spans countless centuries and carries cutting edge ideas on time travel and alien intervention. It shows two of the genre's masters at their groundbreaking best.

Wolf draws on yoga and quantum physics to show that time is a flexible projection of mind. Cheating time, he says, is an ancient metaphysical idea from the Vedas having to do with moving through meditation to a place where time stands still.

**Manifold: Time** Stephen Baxter 2003-12-16 “Reading Manifold: Time is like sending your mind to the gym for a brisk workout. If you don’t feel both exhausted and exhilarated when you’re done, you haven’t been working hard enough.”–The New York Times Book Review The year is 2010. More than a century of ecological damage, industrial and technological expansion, and unchecked population growth has left the Earth on the brink of devastation. As the world’s governments turn inward, one man dares to envision a bolder, brighter future. That man, Reid Malenfant, has a very different solution to the problems plaguing the planet: the exploration and colonization of space. Now Malenfant gambles the very existence of time on a single desperate throw of the dice. Battling national sabotage and international outcry, as apocalyptic riots sweep the globe, he builds a spacecraft and launches it into deep space. The odds are a trillion to one against him. His mission is complicated by the rise in tensions between Earth’s government and the Federation over access to rare heavy metals. As the agent finds himself locked in a battle for life and death on the eerie, lunar landscape, the larger conflict explodes across space, leaving mankind’s future in doubt. **How the World Was** One Arthur C. Clarke 2020

*2001: A Space Odyssey and Lacanian Psychoanalytic Theory* Daniel Bristow 2018-01-31 In 1968, Stanley Kubrick completed and released his magnum opus motion picture 2001: A Space Odyssey; a time that was also tremendously important in the formation of the psychoanalytic theory of Jacques Lacan. Bringing these figures together, Bristow offers a study that goes beyond, as the film did. He extends Lacan’s late topological insights, delves into conceptualisations of desire, in G. W. F. Hegel, Alexandre Kojève, and Lacan himself, and deals with the major themes of cuts (filmic and psychoanalytic); space; silence; surreality; and ‘das Ding’, in relation to the movie’s enigmatic monolith. This book is a tour de force of psychoanalytic theory and space odyssey that will appeal to academics and practitioners of psychoanalysis and film studies, as well as to any fan of Kubrick’s work.

*The Fortress of Solitude* Jonathan Lethem 2014-08-14 From the prize-winning author of Motherless Brooklyn, a daring, riotous, sweeping novel that spins the tale of two friends and their adventures in late 20th-century America. This is the story of two boys, Dylan Ebdus and Mingus Rude. They live in Brooklyn and are friends and neighbours; but since Dylan is white and Mingus is black, their friendship is not simple. This is the story of 1970s America, a time when the simplest decisions - what music you listen to, whether to speak to the kid in the seat next to you, whether to give up your lunch money - are laden with potential political, social and racial disaster. This is also the story of 1990s America, when nobody cared anymore. This is the story of what would happen if two teenaged boys obsessed with comic book heroes actually had superpowers: they would screw up their lives.

Where has it gone? What has happened? Seemingly unconnected, journalist Carol Dawson is investigating the unusual sightings of whales in Miami, which may or may not be linked to the missing rocket. Armed with Oceanographic research equipment, Carol charts a boat skippered by Nick Williams and Jefferson Troy and heads to the Gulf of Mexico. What they find can barely be explained but could be worth untold riches. **Conqueror** Stephen Baxter 2010-06-03 It begins with the death of the last Roman and ends with the crowning of a king, the birth of a new order. As the centuries between these two events pass, as Britain emerges from the ruins of Roman rule to become a vibrant, rich power in its own right, as invasions ebb and flow and Kings rule and die, a single thread is spun and stretched. A prophecy found in the shadow of Hadrian's crumbling wall, a prophecy preserved by the monks at Lindisfarne. A prophecy remembered, a prophecy handed down. A prophecy that speaks of the cross, of dragons from the north. Of a new world and of a new empire. A prophecy fulfilled in one remarkable year: 1066. CONQUEROR is a fast moving historical thriller that casts a bright light onto a shadowy period of British history and brings it to vibrant life. Steeped in blood and violence this was also a time of artistic endeavour, a time of nation building and law-giving. And it is a time of chance, where history can be shaped by the Weaver ...
