The Volkswagen Beetle Jonathan Wood 2008-03-04 The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce

No Accidents Sonja Wells 2016-05-26 Dayla Evans has suffered the loss of her son, and then her husband. Her Christian faith and support from her church, family, and friends help to ease her emotional pain but her life has become a rigid routine as she immerses herself in her job teaching hearing impaired students. Although she is content living alone, she misses the companionship of someone to share her love for hiking. Unbeknownst to Dayla, when she is pressured to attend her co-worker's end-of-the-school-year celebration, it is the beginning of something remarkable. Dayla meets Kent, another outdoor enthusiast, at the party. Eventually, the two plan a week-long Autumn backpacking trip in the Great Smoky Mountains National Park of Tennessee. Unforeseen circumstances interfere with their plans. Dayla's faith gives her the courage and determination to proceed with the backpack trip, but something terrifying happens along the way. The events that coincide, confirm her belief that, although we may not have control of all that happens in life, we are given free-will to make choices in whatever good, or bad, comes our way. "No Accidents" is the story of coinciding events during an adventure in the beautiful Smoky Mountains, and how one woman, and one man, develop a heightened awareness of the meaningful messages God sends. It encourages the reader to pay attention to situations and coinciding events that arise in our own lives and to appreciate that, if we are open to it, God will provide the guidance for making choices that leads to something wonderful.

Lemon-Aid New Cars and Trucks 2013 Phil Edmonston 2012-12-01 Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel? These questions and more are answered in this informative guide.
